Notification of Treatment Issued

Welton Oscar, 20/11/98
Fox Covert Keepers Lane
Hyde Heath
Amersham,
HP65RJ

Dear Doctor,

This patient received an assessment by our doctors at The Superdrug Online Doctor service on the 06/05/22 for J45.9 Asthma and a prescription for: 2 Inhalers Ventolin® Evohaler 100mcg was issued to them.

Your patient was provided with a repeat prescription of their inhaler following an online consultation and assessment, where we established the suitability for online prescribing. Their asthma control, including use of relievers, previous exacerbations and recent asthma reviews as well as their health including medical history, medications, allergies and smoking status were assessed.

They have been advised on inhaler use, potential side effects and red flag symptoms requiring urgent medical attention as well as health promotion advice on smoking cessation as appropriate.

We also strongly recommended that your patient arrange for at least annual asthma reviews in line with NICE SIGN guidelines and have encouraged them to download and use the [asthma.org.uk](https://www.asthma.org.uk) Asthma Action Plan.

Please do not hesitate to contact us if you would like further information. Our online consultations include a medical assessment questionnaire specific to the patient's condition which was designed by our GMC registered Doctors. Our Doctors then review the assessment, discuss further with the patient as appropriate and ensure it is safe to prescribe within GMC and relevant national guidelines before issuing any prescription. The service was found to be Safe, Effective, Caring, Responsible and Well Led following the most recent CQC inspection.

Kind regards,

Dr Beverley Kugler
